## **New Lindsay Brochure Focuses on Improving Biofuel ROI Through Efficient Irrigation Solutions**

**(OMAHA, Neb.)** – July 21, 2009 –Lindsay Corporation, maker of Zimmatic® irrigation systems, has produced a new biofuels brochure called *Improving Biofuel ROI Through Efficient Irrigation Solutions*.

The eight-page full-color brochure includes information on key biofuel crops, the benefits of biofuels, market growth opportunities for biofuels, and irrigation management recommendations to help growers optimize the yield, size distribution and quality of biofuel crops.

“Several factors are influencing a growing worldwide interest in biofuels, including climate change, rising oil prices, future oil supplies, and exploration and drilling costs,” says Dirk Lenie, vice president of marketing and export sales at Lindsay. “Lindsay is committed to helping growers meet the increased demands of a fuel-hungry world and to providing growers with the tools needed to produce more biofuel per gallon of water used.”

The Lindsay brochure provides a step-by-step guide to properly plan and successfully complete a biofuels irrigation project. Key biofuel crops discussed include:

- Canola
- Corn
- Jatropha
- Miscanthus
- Soybeans (soya)
- Sugar beets
- Sunflowers
- Sweet Sorghum

The brochure also details factors to consider when selecting biofuel crops, such as water use, soil type, climate and growing season.

For a copy of the biofuels brochure, go to the downloads section at [www.zimmatic.com](http://www.zimmatic.com).

### **Lindsay**

Lindsay manufactures and markets Zimmatic®, Greenfield™, Stettyn and Perrot center pivot, lateral move and hose reel irrigation systems, and GrowSmart™ controls, all of which are used by farmers to increase or

stabilize crop production while conserving water, energy and labor. The award-winning company also produces large-diameter steel tubing and provides outsourced manufacturing and production services for other companies. Watertronics®, a wholly owned Lindsay subsidiary, is a leader in the manufacturing and servicing of agricultural, sports turf, landscape and golf course irrigation pump systems. Additional information can be found at [www.zimmatic.com](http://www.zimmatic.com) or [www.lindsay.com](http://www.lindsay.com).
